Isho sensitivity skills

Masks signature = very good 90% chance
Can mask signature = 50% chance success
Falsifies signature = very good, 90% chance
Can falsify sign. = 50% chance success
Acute tra-sense = Not fooled, long range
No signature = No copra. No detection
Interferes dyshas = 50% success
Mimics signatures

NOTES:

0 Max IP = auto unconscious and dying.

Most animals flee when down to last 20% of IP.

Size modifier is already included in armour and damage

Creatures with a 4+ size don't suffer first -2 to -8 Wound penalties.

Creatures with a 4+ size has size modifier as stat bonus on E,S,A,K rolls.

Creatures with a 4+ size deliver extra knockback and +1D E on all 15+ injuries.

0 isho and 0 isho points normally means the creature has no copra (isho signature).

Evids are all constructs, created by shantic sholaris, incapable of reproduction																				
All evids rely on tra-sense																				
All evids must recharge sooner or later																				
The seven basic evids types can be found in several locations. Some are even still created today. They have only limited intelligence/cunning																				
The greater evids are all unique with greater cunning and are one of their kind																				
Evids cannot be stunned, fall unconscious or suffer Kill Rolls																				
Evids do not suffer injury penalties, but do get -40 on all actions when only 1/4 IP left
